Skills

Full stack web development
Design and build user-focused applications using modern front-end frameworks, back-end services, and database integration. These apps have been deployed via traditional cloud providers, locally, and on AWS.
Next.js, MERN stack, LAMP stack, AWS

Mobile app development
Develop and deploy user-friendly mobile applications with intuitive interfaces, optimized performance, and seamless cross-platform functionality.
Android Studio, React Native

AI & Machine Learning
Experience implementing text-to-text and text-to-image models inside both web and local environments.
ReAct, Hugging Face, Docker

Technical Skills
Git, Kotlin, Android Studio, React Native, Java, Python, C, C++, HTML, CSS, Tailwinds CSS, Flask, Javascript, Typescript, Bootstrap, SQL, SQLite, React, Next.js, Node.js, npm, Docker, AWS, Word, Powerpoint, Excel

Summary

Education

University of Central Florida — Bachelors • 3.16 GPA
Computer Science — May 2022 – April 2026

University of Central Florida — Minor
Secure Computing and Networks — May 2022 – April 2026

Experience

Trader Joe's — Orlando, Fl
Crew Member — September 2026 – Present
Rotate between register, stocking, and product demo stations each shift, adjusting quickly to whatever the store needs. Build friendly rapport with customers, offer product recommendations, and help keep shelves full and displays organized.

Publix — Orlando, Fl
Deli Associate — April 2025 – July 2026
Delivered excellent customer service in a fast-paced team environment while maintaining accuracy and efficiency. Gained experience with task prioritization, problem-solving, and clear communication.

Jimmy Johns — Orlando, Fl
Student Lead — September 2022 – September 2025
Supervised and coordinated a team of 5–10 employees at a time, ensuring smooth daily operations in a high-volume environment. Developed leadership, time management, and communication skills applicable to any workplace.

Projects

LoganLifts (web app) — June 2025 – Present

- For a given exercise, users are able to log and view each of their lifts and even calculate their projected one-rep-maxes (1RMs) or equivalent sets.
- Users can either use existing public exercises or create their own custom exercises. Exercises include "loadable bodyweight" variations such as weighted pull-ups.
- Optionally, users may suggest these exercises to be public and available to other users.

UCF Senior Design Project - "ConversationELLE" (web app)
September 2024 – May 2025

- Allows students to chat with our AI chatbot mascot - Tito the parrot.
- Tito asks the language learner questions about their assigned vocabulary words and chats with them in Spanish.
- Implemented within a large codebase of existing "ELLE" language learning games.

Sudoku (web app) — May 2024 – Present

- Users can play Sudoku games ranging from easy to extreme difficulty.
- Features include timer, mistake counter, on-board note-taking, and more.
- Implements Donald Knuth's "Algorithm X" to efficiently generate uniquely solvable Sudoku boards.
